FORENSIC LABORATORY
DNA AND DRUG TESTING
EXPERT WITNESS SERVICE

COMPANIES AND ORGANIZATIONS

REASONS FOR DRUG TESTING IN THE WORKPLACE

Among the reasons of drug testing, the most common are:

- random testing
- reasonable suspicion
- pre-employment test
- periodic testing
- return to duty

RANDOM TESTING

Random testing is by far the most efficient test because it is conducted on an unannounced basis random selection process (computer-generated).

Employers ensure that there is no bias and that all employees have an equal chance of being selected, even those who have been drug tested recently.

REASONABLE SUSPICION

This test is performed when supervisors have reasonable cause to suspect an employee of drug use (abnormal behavior, disorientation, confusion or inability to complete routine tasks ...)

Drug testing can help to improve employees productivity while decreasing absenteeism, accidents and turnover.
